

Your Pain Points – addressed by bioLock:

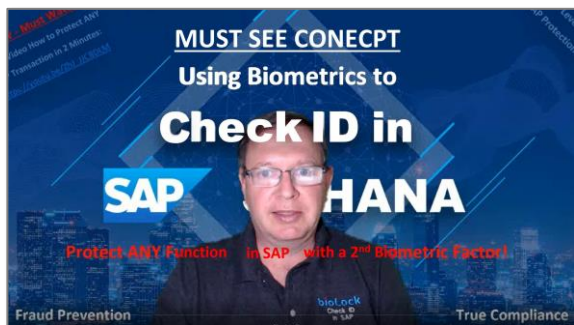

- Eliminate Password Sharing
- Prevent Account Take Overs
- Reduce Risk of Hacker Access
- Reinforce SAP GRC and SOD's
- Reduce Signature Times
- Enforce 4 Eyes Principles
- Secure SAP Admin Profiles
- Dual Confirmation Approvals
- True Compliance
- Clear Accountability
- Safe Fast User Switching
- Effective Fraud Prevention

WHAT – does bioLock do to Enforce Zero Trust?

With Zero Trust, No Actor can be Trusted Until they're Verified! bioLock allows you to set unlimited re-authentication checkpoints and use MFA technology, including biometrics, to ensure only specifically invited users get access to sensitive functions or data inside SAP. See this video to learn how only verified and invited authorized users can logon, access, and change data ([YouTube](#)).

Palm Vein Fingerprint Smart Card Face Recognition Biometric NFC Band Password PIN IP Nationality

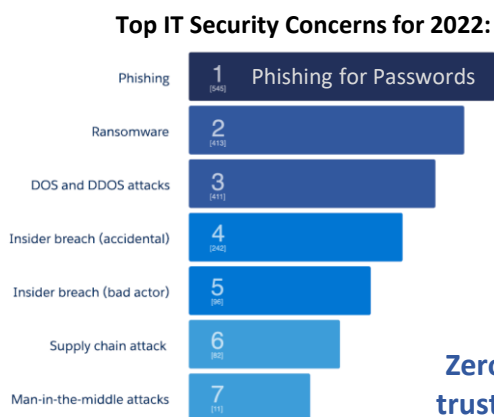

Watch this 10-min Technical Presentation ([YouTube](#))

HOW – does bioLock do it?

This presentation is a very condensed 10-min Mini Demo Video explaining in detail how the bioLock technology works in SAP. You will see how easy it is to protect the functions and even buttons. Learn how corruption and collusion controls are established with additional “Allow List” and “Dual Confirmation Groups”. Further, you will see how users, identified with biometrics, are recorded in the log file for compliance and accountability.

WHY – Because Top IT Security Concerns Call for MFA as TOP Defense Strategy to Enforce ZERO TRUST:

Source: Salesforce Research Top Data Security Trends for 2022

Prevent ATO's
“Account Take Overs”

Hackers don't
“HACK IN”
Hackers “LOG IN”
Using Passwords

Zero Trust = No actor can be trusted until they are verified

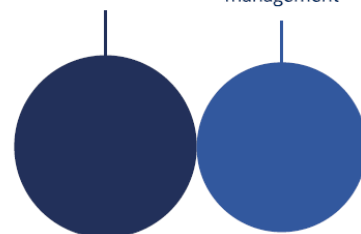

Top 2 Strategies to Defend:

77%

Multifactor authentication

72%

Identity and access management
